Labs, Performance, Activity Classes: Dr. Chris Korey

In the 2020-21 Academic Year, expect some changes to how these courses normally run.
Strategies for Academic Success

Outside of Class

- Pay attention to the Syllabus Instructions!
- These courses are likely to have pre-meeting assignments that will replace in-class lectures - make sure to complete these before showing up in-person
- Expect a Rotation Structure - (Part of class time or weekly) - understand when and how you will take the course

Inside of Class

- Smaller Groups - less use of partners
- Be prepared for Socially Distanced Set-ups that may include out of class students
- Focus on the work that must be hands on
- Expect some analysis or normally in-class work to be done outside of the classroom space
- Understand what the plan is if the course must move online
